Our Hybrid approach

To meet the ever-changing trends in the chemical industry, Connect Chemicals has evolved into a unique hybrid company. To catalyze this change, Connect Chemicals has developed a Modular Custom Manufacturing process. Own resources are augmented by external cutting-edge technology to serve the specific customer requirements. Continuously & progressively the company invests in state-of-the-art facilities, R&D labs, advanced technology, analytical capabilities and a highly qualified technical team of experts worldwide. Our Technology Center offers 600 m² space, with 12 fume hoods, 10+ experienced chemists, and a fully equipped analytical department which further positions us to proficiently manage diverse organic synthesis tasks.

Our Technology Center offers

Research projects

Customer specific product
development

Full scale commercial
production
